

# STUDENT INTERNS

Powers & Sons Construction is a third-generation, family-owned firm offering diversified general contracting and construction management services.

With a focus on excellence, Powers & Sons creates built environments where time, cost, and unmatched quality converge to benefit the clients and communities we serve. Our talented team delivers new construction and renovation projects for clients ranging from **K-12 schools** and **universities** to city and state **government agencies**, hospital and **healthcare** providers, global **retail** and **restaurant** brands, industrial, **utility**, and pharmaceutical companies, arts and **cultural** institutions, **hotel** and **casino** operators, **nonprofit** organizations, and real estate developers specializing in affordable **multi-family** housing and **mixed-use** properties. Committed to operating construction sites that are diverse, equitable, and inclusive, our core values are the foundation of a company culture that is collaborative and supportive. Founded in 1967, Powers & Sons serves communities across Chicago, Northwest Indiana, and Central Indiana.

## ROLE & RESPONSIBILITIES

Our internship program is designed to prepare diverse students for construction careers in Chicago and Northwest Indiana. You will benefit from the real-world insights of construction pros with decades of collective knowledge and insights to share.

- Our interns work closely with construction project engineers, professional and administrative staff, estimators, and project managers in office and/or field settings.
- You will gain broad exposure to all aspects of business operations for a successful general contracting and construction management firm.
- In addition, you will learn and apply industry and company safety standards. You will observe, research, and complete essential functions in the design and construction process.

## QUALIFICATIONS REQUIRED

We are seeking college students enrolled in an accredited college or university undergraduate program in construction, engineering, or architecture.

Powers & Sons offers hands-on professional experience in office and field settings. You'll work alongside and with guidance from construction professionals with decades of collective experience and insight to share! Successful interns will demonstrate the following:

- A learning leader's mindset and welcome career development coaching and training.
- Excellent written and verbal communication with critical thinking and problem-solving skills
- G.P.A. of 3.00 or higher
- Ability to work full-time between May and August.
- Strong attention to detail, accuracy, and follow-through
- Proficiency in Microsoft Office products
- Valid U.S. driver's license and authorized to work without restriction in the U.S.
